Subject: Final R3 Reports

Rich and Kelley,

In order to accommodate the request to only post final (internally validated) reports on the FTP site and because of the size of the reports we have decided to split the final report into three parts. This will apply to all work orders associated with this project.

Report 1 of 3 - Metals and Glycols
Report 2 of 3 - Organics
Report 3 of 3 - Inorganics

We will also report the EDDs in three parts and each file will be labelled EDD Part 1 of 3, EDD Part 2 of 3, and EDD Part 3 of 3 and will correspond to the final pdf reports listed above. All EDDs and pdf files include the WOs. Attached is a list of

samples within each Work Order (for R3 only) for all samples received as of Thursday (2/9).

I will create a separate directory on the FTP site to match each work order (each work order is about a week's worth of samples) so that you will be able to see the 3 pdfs and 3 EDDs in one directory.

(When viewing the pdf reports the actual reported results are starting around page 33 due to the amount of COCs. If that's a problem let me know and we can move the COCs to the back. I was trying to avoid making too many changes from our routine process.).

If there is anything that needs modified or organized better please let me know and we'll do our best to accommodate.

Thanks,
Cindy
